

# RS201E Integrated Amp & Network Streamer

|                    |                                                                                                                                                                                                                                                                                      |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dimensions:        | 10.9" x 8" x 3"                                                                                                                                                                                                                                                                      |
| Weight:            | 5lbs                                                                                                                                                                                                                                                                                 |
| Finish:            | High-quality anodized aluminum front-top plates.                                                                                                                                                                                                                                     |
| Display:           | 8.8" Wide view multi touch screen                                                                                                                                                                                                                                                    |
| Maximum Output:    | 50W x 2 into 4Ω                                                                                                                                                                                                                                                                      |
| Speaker Impedance: | 4~16 Ω                                                                                                                                                                                                                                                                               |
| Audio In:          | <b>Analog:</b> 1x Line Unbalanced RCA<br><b>Digital:</b> 1x Optical, 1x USB, Bluetooth                                                                                                                                                                                               |
| Audio Out:         | <b>Analog:</b> 1x Unbalanced RCA, 3.5mm Headphone Jack<br><b>Digital:</b> 1x Optical , 1x HDMI                                                                                                                                                                                       |
| Video Out:         | 1x HDMI 2.0 ( up to 3840 x 2160 / 60Hz )                                                                                                                                                                                                                                             |
| Network:           | Ethernet 10/100/1000 BASE-T<br>WiFi (802.11 b/g/n/a/ac) 2.4Ghz/5Ghz Dual Band                                                                                                                                                                                                        |
| Media Support:     | 1x USB 2.0, 1x USB3.0 (File system - NTFS/FAT32, Supported capacity - 512GB, External HDD by 4TB)<br>1x MicroSD(File system -NTFS/FAT32, Supported capacity - 512GB)<br>1x SATA3.0 SSD(File system - NTFS, Supported protocol - FTP/WebDav, 4TB)<br>1x USB Type C (Only for service) |
| Remote:            | BT Remote control                                                                                                                                                                                                                                                                    |
| Remote App:        | ROSE Connect (Android, iOS)                                                                                                                                                                                                                                                          |
| Accessory:         | AC adapter, Quick Start Guide, BT Remote control, Battery (AAA) x 2, Screw for SSD x4, Screwdriver                                                                                                                                                                                   |
