PRODUCT DIMENSIONS AND CLEARANCES

* 49 1/4" : Minimum space for installation

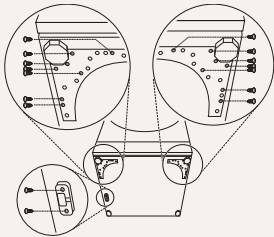

● To ensure sufficient clearance for water lines, the drain line and airflow, allow minimum clearances of at least 1 inch (2.5 cm) at the sides and 4 inches (10 cm) behind the unit. Be sure to allow for wall, door, or floor moldings that may increase the required clearances.

NOTE

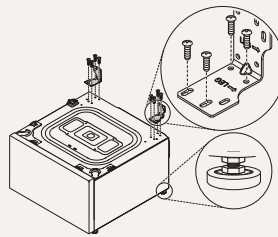

● Do not use a drip pan as it can block the drawer. Using a drip pan may result in increased vibration and noise during operation.
