

INSTAWIDTH™ SOUNDBARS

**EASY, PORTABLE,
BEAUTIFUL**

A slight departure from traditional architectural loudspeakers, soundbars are a new necessity. Simple to install, our passive soundbars are a massive improvement over your flat panel's internal audio system. Add a floor standing or architectural subwoofer, and you'll be enjoying your television like never before.

PRODUCT ID

The SBR41 & SBR41-LCR are single channel enclosures that can be placed on the Left, Right, or in the Center above or below the video display; or three can be placed in a linear row above or below the video display. The SBR43-50C is a single center channel enclosure. The remaining SBR43-50 to SBR43-85 models contain all three channels: Left, Center and Right.

Our InstaWidth™ Soundbar Range has been specially developed to extend and can be adjusted in order to exact match any model of TV from 50" to 85" widths, for the ideal visual symmetry within a space.

The drivers are mounted in extruded aluminum enclosures and can be mounted on the wall, or attached to a third-party mount connected directly to the video display. Regardless of your choice of mounting and position, the Soundbar and LCR's will deliver pristine music and movie soundtracks and compliment your home theater experience.

INSTAWIDTH™ SOUNDBARS
