PREMIUM TECHNOLOGY

HARVESTFRESH™

Proprietary 3-color light technology simulates the 24-hour cycle of the sun. By mimicking a full day of sunshine, produce has been proven to retain its vitamins and minerals for up to five days longer than ordinary refrigerators.

EVERFRESH+™

EverFresh+ technology keeps fresh food fresher three times longer than the average refrigerator – for up to 30 days! Meticulous temperature management and precise humidity control mean every stalk, head, or bunch you bought as a healthy option or key ingredient stays fresher longer.

FREEZE GUARD

Beko Freeze Guard technology uses an inverter compressor and electronic temperature control system to ensure the freezer continues to work in ambient temperatures as low as 5° F, without any loss of performance.*

*The fridge compartment will not work properly in low temperatures, so we recommend you only use the freezer compartment in low ambient temperatures.
