Installation Instructions

- Before Using Your Refrigerator
Remove the exterior and interior packing.
Before connecting the refrigerator to the power source, let it stand upright for approximately 4 hours.
Clean the interior surface with lukewarm water using a soft cloth.
Installation Instructions
The refrigerator is designed to be installed in a kitchen or other suitable location.
Place your refrigerator on a floor that is strong enough to support the refrigerator when it is fully loaded.
Allow 1 inch of space between the back and sides of the refrigerator, which allows the proper air circulation.
Level the refrigerator away from front leveling and adjust all four casters.
Level the refrigerator away from front leveling and adjust all four casters.

- Electrical Connection
The refrigerator is designed to be installed in a kitchen or other suitable location.
Place your refrigerator on a floor that is strong enough to support the refrigerator when it is fully loaded.
Allow 1 inch of space between the back and sides of the refrigerator, which allows the proper air circulation.
Level the refrigerator away from front leveling and adjust all four casters.
Level the refrigerator away from front leveling and adjust all four casters.

Important Safety Instructions

- Read all instructions before using the refrigerator.
DANGER or WARNING: Risk of child entrapment.
To avoid the possibility of child entrapment, please read the following precautions before throwing out the refrigerator.
Remove all doors from the refrigerator.
Leave the shelves in place so that children may not easily climb inside.
Never allow children to operate, play with, or crawl inside the refrigerator.
Refrigerators of all refrigeration products contain refrigerants, which under the guidelines of federal and local regulations must be removed before disposal of product.
Never clean refrigerator parts with flammable liquids.
Do not store or use any gas or liquid in the vicinity of this or any other refrigerator.

Table with 2 columns: PROBLEM and POSSIBLE CAUSE. Rows include: Refrigerator does not operate, Compressor turns on and off frequently, Temperature inside the refrigerator is too warm, Temperature inside the refrigerator is too cold, Popping or clicking sound, Bubbling or gurgling sound, Water being, Manner forms on inside refrigerator, Manner forms on outside of refrigerator.

For any Questions or concerns, please contact us at customerservice@stirlingmarathon.com or visit us at www.stirlingmarathon.com

Operating Your Refrigerator

- Temperature Settings
Your refrigerator has one control for regulating the temperature.
The first time you turn the unit on, adjust the temperature control knob to "5" and run for at least 1 hour before putting foods inside.
The range of the refrigerator temperature control is from position "1" the warmest to "10" the coldest.
Turning the temperature control knob to "10" position stops the cooling cycle but does not shut the power to the unit.
If the unit is unplugged, loss power, you must wait 1 to 3 minutes before restarting the unit.
Large amount of food will lower the cooling efficiency of the appliance.
Do not place foods on the air outlet, and leave spaces for airflow.
If you choose to change the thermostat setting, adjust thermostat control by one increment at a time.
Adjust several hours for temperature to stabilize between adjustments.

- The freezer compartment is designed for the long-term storage of frozen food.
The storage life of frozen foods varies and the recommended storage time should not be exceeded.
Place frozen food into the freezer as quickly as possible after purchase.
The unit is not designed to defrost automatically.
How To Defrost
Defrost the freezer compartment when the ice / frost is approximately 1/2" thick or every 3 months, whichever comes first.
Remove all contents from the freezer compartment.
Leave the freezer door open to allow accumulated ice / frost to melt.
Remove large pieces of ice as needed.
Do not use hot water or other electric heating devices to melt the accumulated ice.
After defrosting, remove accumulated ice / water and wipe the freezer compartment dry with a soft cloth.
In the event that the ice is not visible, proceed in the freezer compartment, place allow the evaporator located behind the freezer wall to completely defrost for approximately 1 hour before restarting the unit.

- How To Change the Interior Light
NOTE: All parts enclosed must be saved to do the installation of the light bulb.
Remove the lamp cover by unscrewing.
Unscrew old bulb from the socket.
Insert new bulb.
Replace the new bulb of the same voltage and wattage.
Re-install the lamp cover by screwing.

1 Year Limited Warranty

When operated in accordance with the instructions in the Use & Care Guide, this appliance is warranted against defects in materials and workmanship for a period of one year from the date of purchase.
This warranty is void if the appliance is used for commercial purposes, is not properly installed, or is damaged by fire, flood, or other causes.
This warranty is not transferable.

Table with 2 columns: Appliance Type and Warranty Type. Rows include: Refrigerator & Freezer, Freezer Only, Dishwasher, and Electric & Gas Range.
