Privacy Settings

Works with
Alexa

Turn your peephole into a camera.

See who's there from anywhere by super powering your door's peephole with a smart, compact camera. Get mobile notifications, and see, hear, and speak to visitors from your phone or tablet. Apartments, houses, condos and more - if there's a compatible peephole on your door, Peephole Cam has it covered.

Makes an impact. Detects them too.

Visitors not pressing your doorbell button? Don't worry - Peephole Cam's built-in Knock Detection lets you know when anyone comes knocking, so you'll never miss a thing.

Sees the outside. Shields the inside.

There's even a built-in peephole just in case you want to see who's there the old-fashioned way, and we added a simple privacy shield to make sure you can look out without letting others look in.

Technical Specifications

Video:	1080p HD, Live View, Night Vision
Field of View:	155° Horizontal, 90° Vertical
Motion Detection:	Advanced Motion Detection with Customizable (Drawable) Motion Zones

Frequently Asked Questions

What is the difference between Peephole Cam and other Ring Video Doorbells?

The main difference between Peephole Cam and other Ring Video Doorbells is its placement. Unlike other Video Doorbells, Peephole Cam is installed directly on your door by replacing its peephole.

If I install Peephole Cam, will I lose access to my existing peephole?

No. Peephole Cam also has a built-in peephole with a privacy shield, so you can look outside without using the camera while preventing others from looking inside your home.

Do I need an existing peephole to install Peephole Cam?

Yes. Peephole Cam replaces the peephole on your door so a peephole is required to begin installation. Peephole Cam is compatible only with standard size peepholes 1/2 in to 9/16 in (12 mm to 14 mm) and door thickness ranging from ~1.3 in to 2.2 in (34 mm to 55 mm).

Can I install Peephole Cam on my apartment or condo door?

Peephole Cam is designed to easily replace your peephole, making it a great solution for apartment renters and condo owners. If you ever need to move, you can easily remove your Peephole Cam and replace it with the existing peephole, so your landlord and HOAs don't have to worry about permanent home alterations. As always, be sure to get permission from your building management or homeowners' association before making improvements to your home security.
