Custom Installation Marine 8

See nothing, hear everything

The marine environment is unforgiving. Any equipment has to survive extremes of temperature, salt spray and hosing down. It's little wonder then that most speakers designed for marine applications sacrifice sound quality for ruggedness.

Of course, any Bowers & Wilkins speaker must sound brilliant. So these marine speakers were first designed to match exacting sound quality standards, then the necessary toughness to survive the harsh marine environment was added. Both models boast IP66 ratings when properly installed, and the metal grille and all screws are marine-grade stainless steel. The driver chassis uses a non-corroding rigid polymer and the tweeter dome has a rear support to prevent permanent deformation when hosed down.

Marine 6 and Marine 8 are super-tough to deal with the most demanding installation environments, with Bowers & Wilkins superior, uncompromising audio quality.

Technical Specifications

Description 2-way system

Drive Units 1x Ø25mm (1 in) soft dome tweeter

1x Ø200mm (8 in) polypropylene cone

bass/midrange

Frequency range (-6dB) 36Hz – 26kHz

Recommended

Amplifier Power

20W - 80W

Sensitivity 88dB (2.83V, 1m)

Nominal Impedance 8Ω (4Ω minimum)

Outer diameter Ø292mm (11.5 in)

Cut-out diameter Ø253mm (10 in)

Depth behind surface 93mm (3.7 in)

Protrusion 8mm (0.3 in)

Net weight 1.7kg (3.8 lb)

Pre-mount Kit PMK C8
