Features

Original vinyl sound. New wireless freedom.

Rediscover the timeless vinyl experience with simple controls and stable wireless connectivity¹. With the PS-LX310BT record player, you can enjoy clear, natural sound, whether you're reliving your favorite LP or sharing a stunning reissue with the family.

Vinyl, unplugged

Now you can enjoy your vinyl collection with all the convenience of wireless technology. Connect via BLUETOOTH® technology to listen to your favorite records on your wireless speakers, soundbar or headphones¹.

One-step auto playback

With one-step auto playback, the turntable will automatically lower the tone arm, find the groove and get the music flowing. And when the record ends, just sit back as the tone arm automatically returns to its resting position.

Get more from your music

Want to get the most from your vinyl? With three settings (low, mid, high) the gain select switch allows you to switch the gain to match the audio level of your record, so you can hear your music at its best, distortion-free.

Aluminum tone arm for superior sound

Featuring a new straight design and sturdy aluminum construction, the tone arm boosts traceability for stable playback, rich, clear sound and powerful bass.

Aluminum platter for stability in motion

The turntable features a belt drive mechanism with an aluminum die-cast platter. Robust yet lightweight, the platter stays stable as it rotates for clearer playback of your music.

USB Ripping

The USB ripping feature makes it possible to rip your favorite vinyl records to digital files, so you can take your favorite albums with you on the go.

Thick dust cover for pitch-perfect playback

A thicker dust cover muffles acoustic pressure from your speakers for better stability and less distortion. This can also be removed, so you can choose to listen to your music your way.

Start spinning right away with RCA Connection

Use the built-in RCA connection to plug directly into your sound system. Whichever you choose, you'll find it quick and easy to set up your deck and get the music playing.
