Virtual 3D Surround Technology

Take your home cinema experience to new heights with sound that seems to come from above as well as all around you.

The B20A features DTS Virtual:X – creating an immersive experience in exhilarating 3D surround sound from a single bar solution.

Clear Voice

Have you ever found it difficult to hear TV dialogue?

Clear Voice makes dialogue and human voices more audible, even in movies and programs where background music and sound effects try to take center stage.

4 Sound Modes

With four different sound modes, you can match your sound to your content and your mood!

Stereo works great for music and podcasts, Standard for TV programs, Game to immerse yourself in your latest battle, and Movie for an expansive theater experience.

Dual Built-in Subwoofers

Dual built-in subwoofers combined with dual bass reflex ports provide a rich and spacious bass range.

Two woofers and two tweeters create sound detail and dimension for all your TV content.

Sound Bar Remote App

With the newly developed Sound Bar Remote App, it's even easier to control your entertainment. The app can switch contents, sound modes, Clear Voice and Bass Extension functions and simple power on/off commands intuitively and easily from your smartphone or tablet.

Easy Wall Mounting

In just minutes, you can install this sound bar and enjoy an instant upgrade to your sound.

Simply place the sound bar under your TV or use the key holes to mount it on your wall.
