Throughout this guide, dimensions may vary by $\pm 1/8"$ (3). Dimensions in parentheses are millimeters unless otherwise specified.

M Series Built-In Ovens

Four striking new looks are just the beginning. Contemporary M series ovens include stainless steel and black glass models. Superior performance features include a more advanced dual vertical convection fan system, touchscreen controls, convenient preset cooking programs and improved interior lighting. There is more usable space inside for deliciousness on a grand scale. M series ovens can be installed in a standard or flush inset application.

M SERIES OVENS

Planning Information

The M series oven can be installed in a standard or flush inset application. If a cooktop is being installed above an oven, a minimum of 1/4" (6) is required between units. Location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

BASE SUPPORT	MIN
Single Oven	250 lb (115 kg)
Double Oven	400 lb (181 kg)

TRIM OVERLAP

Top	1" (25)
Bottom	0" (0)
Sides	1 1/16" (18)

DUAL INSTALLATION

Two 30" single M series ovens can be installed side by side in a standard or flush inset application. A dual installation kit is required. To maintain appropriate airflow, the ovens must be installed into one opening. Any cosmetic or structural material placed between the ovens will impede airflow and is not recommended. Refer to illustrations on pages 14–15.

The dual installation kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the oven can be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 240 volts.

The oven is supplied with a conduit consisting of two insulated hot lead conductors and a bare ground conductor. The wiring diagram covering the control circuit is provided with the oven.

ELECTRICAL REQUIREMENTS—SINGLE OVEN

Electrical Supply	grounded, 240/208 VAC, 60 Hz
Service	30 amp dedicated circuit
Conduit	4' (1.2 m)
Total Amps	22
Max Connected Load	5.4 kW

L Series Built-In Oven

Since their introduction, Wolf L series built-in ovens have taken the culinary world by storm—and not just for their stylish cobalt blue interior and 10 cooking modes. Thanks to a Wolf innovation called dual convection, the L series delivers faster, more consistent results for baking, roasting, broiling—even drying fruits. The Wolf L series oven is offered in the 36" width with unframed door style and tubular handle.

Convection Steam Ovens

The legacy of the “combination oven” goes back decades, to innovative chefs in America and Europe who embraced the combination of air movement with superheated steam to achieve superior results—from breads and roasts to delicate fishes, seafood and vegetables. Wolf combines the benefits of convection and steam for the most innovative steam oven on the market today. Virtually any dish prepared in a conventional oven, range or microwave can also be prepared in the Wolf convection steam oven—with more control. Two widths and three distinct styles compliment the look of Wolf ovens, ranges and cooktops. Convection steam ovens can be installed in a standard or flush inset application.

Microwave Ovens

As true cooking instruments, Wolf microwave ovens have features that make fast meals better meals. New drop down door microwaves feature a door that hinges at the bottom for easier access to foods. Available in 24" and 30" widths, they are designed to match Wolf transitional, professional and contemporary products. Drawer microwave ovens can be conveniently located undercounter, in a corner or below an oven. Wolf also offers both a roomy, powerful standard microwave and a convection model that can microwave, broil and cook in three convection modes. Trim kits to match Wolf ovens are available through an authorized Wolf dealer. Microwave ovens can be installed in a standard or flush inset application.

Warming Drawers

Wolf warming drawers are designed to take care of prepared foods until it's time to serve them. You can adjust the temperature, keeping moist foods moist and crisp foods crisp. Warming drawers are ideal for proofing dough. They can also be used to warm robes and towels. Drawer fronts are available to match the look of Wolf ovens, sealed burner rangetops and outdoor grills. The integrated drawer front allows for a custom panel and handle. Model WWD30O, approved for outdoor installations, is ideal for any outdoor kitchen.

DRAWER FRONT OPTIONS

Wolf warming drawer fronts allow for many design options, but the warming drawer itself will be the same for all applications. A panel mounting kit is required when installing a custom panel. The panel mounting kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

The 2" (51) thick drawer front, in 30" and 36" widths, is designed to be installed below a sealed burner rangetop or outdoor gas grill, so the panel aligns properly with the front of the rangetop or grill. Dimensions for the warming drawer remain the same, even though the drawer front may be wider to match a Wolf 36" oven, sealed burner rangetop or outdoor grill.

WARMING DRAWERS

Planning Information

The warming drawer must be installed with a Wolf drawer front, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Specific installation instructions are included with the drawer front.

The warming drawer can be installed in a standard or flush inset application (excludes L series drawer front).

For a standard installation, the drawer collar and front panel sit proud of the cabinet face frame. A recessed installation requires the cabinetry be recessed by $\frac{3}{16}$ " (5) so the collar is flush with the cabinet face frame but the drawer front will sit proud. A flush inset installation (excludes L series) requires the drawer collar and front panel be recessed to be flush with surrounding cabinetry. Refer to illustrations on the following pages for minimum cabinet dimensions for your specific installation.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum $\frac{1}{8}$ " (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

Model WWD300 is CSA approved for outdoor installations.

INSTALLATION REQUIREMENTS

Min Base Support	200 lb (90 kg)
Trim Overlap (top, bottom, sides)	$\frac{5}{8}$ " (16)

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the warming drawer can be placed in an adjacent cabinet within reach of the power cord.

IMPORTANT NOTE: When installed outdoors, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	3' (.9 m)

*Will be visible and should be finished to match cabinetry.

**Dimension provides minimum reveals.

***24 1/8" (613) for E series contemporary drawer front.

NOTE: Location of electrical supply within opening may require additional cabinet depth.

DRAWER FRONT DEPTH (A)	M SERIES	E SERIES
Transitional/Professional	7/8" (22)	1 1/8" (29)
Professional (2" thick)	NA	2 1/8" (54)
Contemporary Stainless	7/8" (22)	NA
Contemporary Black	1" (25)	1 3/8" (35)

Custom front panel depth is dependent on panel thickness. Add 1/4" (6) to the panel thickness to determine the drawer front depth.

Induction Cooktops

Almost instantaneous temperature response. Practically no wasted heat. Induction cooking has been popular among European chefs and homeowners for decades. Now Wolf leads the way in bringing this remarkable technology to North American kitchens. Its secret is magnetism. Electro-magnetic elements cause iron and magnetic stainless cookware to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too.

Transitional models have a brushed stainless steel trim. Contemporary models can be mounted flush with the countertop. The following models have the same stainless steel frame as our module cooktops for paired installations: CI243TF/S, CI304TF/S, and CI365TF/S.

Electric Cooktops

New generation electric cooktops utilize high-frequency pulsation technology for the most exceptional performance and control ever in a Wolf electric cooktop, with blazing hot sears at the high end and steady simmers and melts at the low end—a low-end finesse that is unusual in an electric cooktop. Updated element configuration accommodates a wide variety of cooking vessels and dish preparation.

Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials.

Contemporary induction and electric cooktops can be mounted flush with the top of the countertop, or as a frameless standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cut-out must be provided. Wolf downdraft systems cannot be used with contemporary induction and electric cooktops.

IMPORTANT NOTE: Flush mount installations are intended for granite, solid surface or stone countertop surfaces only.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

Gas Cooktops

Like their oven counterparts, the new generation of Wolf gas cooktops features three new looks—transitional, professional and contemporary. New performance enhancements make delicious results even more of a certainty than ever. Multiple sizes, choice of knob colors and distinctly different grates—the new gas cooktops offer exceptional design flexibility. For a striking, low-profile look, the contemporary gas cooktop fits flush to the countertop with front-mounted controls that integrate directly into cabinetry below.

Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials. If the cooktop is installed above an oven, a minimum of 1/4" (6) is required between units.

The contemporary gas cooktop can be mounted flush with the top of the countertop, or as a standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cut-out must be provided. The countertop must be able to withstand temperatures up to 300°F (149°C). Wolf downdraft systems cannot be used with the contemporary gas cooktop.

Control knobs for the contemporary gas cooktop are designed to be mounted on the front face of cabinetry below the unit. Mounting holes must be drilled through the cabinet face. Refer to the illustrations on pages 78–79 for hole location.

Planning Information

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz

Module Cooktops

Wolf modules have been redesigned to match the updated lines of Sub-Zero and Wolf. Controls, grates and trim allow them to integrate perfectly with their larger counterparts and deliver equal performance. Combine modules à la carte-style to create a custom cooktop, or add specialty functions alongside an existing cooktop.

Full-size cooktops including CI243TF/S, CI304TF/S, and CI365TF/S feature the same brushed stainless frame, making them ideal for pairing with modules.

Planning Information

IMPORTANT NOTE: Wolf does not recommend the use of downdraft ventilation with the steamer, fryer or grill modules.

A minimum 2" (51) is required from the bottom of the module to combustible materials. For the teppanyaki module, a minimum 7/8" (22) is required from the bottom of the unit to any material.

Refer to illustrations on the following pages for installation of modules.

MULTIPLE COOKTOPS

When multiple cooktops or modules are installed side by side, refer to the chart and illustration below for typical configurations. The cut-out dimensions provided will accommodate the use of an optional filler strip if desired.

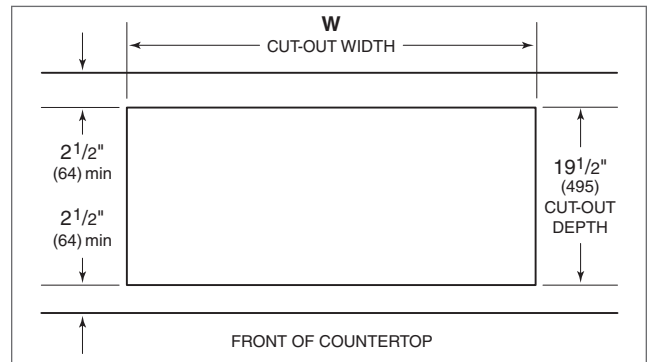

For specific multiple cooktop and module configuration options or the installation of more than six modules, contact Wolf Customer Service at 800-222-7820.

Countertop cut-out

Planning Information

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

When multiple cooktops or modules are installed side by side, each must have its own separate electrical supply.

ELECTRICAL REQUIREMENTS

ELECTRIC MODULES

Electrical Supply	grounded 3-wire, 240/208 VAC, 50/60 Hz
Steamer, Fryer, Grill, Teppanyaki	15 amp dedicated circuit
Induction, Electric	20 amp dedicated circuit
Conduit	flexible 4' (1.2 m)

GAS MODULES

Electrical Supply	grounded, 120 VAC, 50/60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	6' (1.8 m)

DRAIN OUTLET

Steamer and fryer modules require a method for draining hot water and oil. For the steamer module, options include connecting a drain hose from the 5/8" (16) outlet tied into an existing drain, a separate drain with freefall or placing a heat-resistant receptacle under the drain outlet. For the fryer module, the drain outlet must be accessible to drain oil into a heat-resistant receptacle.

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

When multiple gas cooktops or modules are installed side by side, they can receive their gas supply from a common line. However, each unit must have its own regulator installed between the mainline and the cooktop or module.

Wolf natural gas cooktops will function up to 10,250' (3124 m) in altitude without adjustment and LP gas cooktops will function up to 8,600' (2621 m). If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

WOLF

Coffee Systems

Make professional-quality coffee, espresso, cappuccino, latte and more. The Wolf coffee system automatically steams and foams the milk perfectly. Water temperature and brew strength are adjustable. Uses either whole-bean or ground coffee. The design pairs beautifully, either side-by-side or in a tower application, with other Wolf products such as the convection steam oven. Coffee systems can be installed in a standard or flush inset application. All 30" trim options are based on model EC24/B.

Coffee System

DIMENSIONS

WIDTH	W
24" Model	$23\frac{1}{2}"$ (597)
30" Trim	$29\frac{7}{8}"$ (759)

Planning Information

The coffee system can be installed in a standard or flush inset application. All 30" trim options are based on model EC24/B. The sides of the cabinetry opening must be adequate to support installation of the mounting slides. Refer to the illustration below.

Finish the edges of the opening. They may be visible when the unit is slid forward.

For standard installations, face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

BASE SUPPORT		MIN
Coffee System		100 lb (45 kg)
TRIM OVERLAP		
	24" MODEL	30" TRIM
Top	3/16" (5)	3/16" (5)
Bottom	0" (0)	0" (0)
Sides	11/16" (18)	37/8" (98)

COMBINATION INSTALLATION

To install a coffee system above a cup warming drawer, one opening for both units must be specified. To achieve the minimum reveal between units, place the coffee system support rails on top of the cup warming drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal.

Side support

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Dual Fuel Ranges

Discover a new world of cooking—the best of two worlds, actually—with a Wolf dual fuel range. Topside, gas cooking in all its glory, with the fine control of dual-stacked, sealed burners and options that include the remarkable French top. Below, that marvel of culinary technology, the Wolf convection electric oven. Its two fans and four heating elements let you select from 10 cooking modes so you can choose the one precisely suited to the dish you’re preparing. Ovens are self-cleaning. With a variety of range widths to choose from, kitchens large and small become gateways to the exciting new world of dual fuel cooking. All models are constructed of stainless steel and can be ordered in natural or LP gas.

Double Griddle	30,000 (8.8)	26,000 (7.6)
French Top	15,000 (4.4)	15,000 (4.4)

Planning Information

When installing against a combustibile surface, a minimum 10" (254) riser is required for a 36" dual fuel range with charbroiler or griddle and all 48" and 60" models. Follow all minimum clearances to combustibile surfaces shown in the illustration on the following page.

A Wolf pro ventilation hood is recommended with the dual fuel range. Refer to page 144 for pro ventilation.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is being used with models that require a 50 amp breaker, the cord must be designated for use with ranges and rated for 240/208, 50 amps and must include 3 or 4 conductors. A 4-conductor cord is required for installations where grounding through the neutral is prohibited.

Wolf dual fuel ranges have a terminal block that allows for a 3-wire or 4-wire installation.

ELECTRICAL REQUIREMENTS

SINGLE OVEN RANGE

Electrical Supply	grounded, 240/208 VAC, 60 Hz
Service	30 amp dedicated circuit

60" Range	60 1/4" (1530)	31" (787)

Gas Ranges

Our gas ranges offer the same function, durability and exhilarating performance our ranges have become famous for. Now add the fine control of dual-stacked, sealed burners for gas cooking with superior results. Choose from a multitude of sizes and features to fit your cooking style. Standard features include an infrared broiler and convection baking. Options include infrared griddle, charbroiler and the innovative French top. All gas range models are constructed of stainless steel and can be ordered in natural or LP gas.

Planning Information

When installing against a combustible surface, a minimum 20" (508) riser is required. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

A Wolf pro ventilation hood is recommended with the gas range. Refer to page 144 for pro ventilation.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 110/120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	6' (1.8 m)

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

Wolf natural gas ranges will function up to 8,600' (2621 m) in altitude without adjustment. If the installation exceeds this elevation, contact an authorized Wolf dealer for a high altitude conversion kit. LP models do not require conversion.

WOLF

Induction Ranges

Experience a new way cooking with a Wolf induction range. Magnetism allows the ultrafast, energy efficient surface elements to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too. The electric convection oven with two fans and four heating elements let you select from 10 cooking modes and is self-cleaning. Wolf induction ranges are constructed of stainless steel and come in 30" and 36" widths. Transitional models have a tubular handle and professional models feature a pro handle.

Planning Information

Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

IMPORTANT NOTE: Adjacent countertops must be at least 35⁷/₈" for flush installation to top of unit.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is being used with models that require a 50 amp breaker, the cord must be designated for use with ranges and rated for 240/208, 50 amps and must include 3 or 4 conductors. A 4-conductor cord is required for installations where grounding through the neutral is prohibited.

Performance may be compromised if the electrical supply is less than 240 volts.

ELECTRICAL REQUIREMENTS

Sealed Burner Rangetops

Wolf sealed burner rangetops incorporate all the gas cooking features of a Wolf dual fuel range. Customize your rangetop with your preferred combination of burners (from four to six), infrared griddle or charbroiler, or the remarkable French top. Compared with conventional electric elements, the infrared elements of the charbroiler and griddle are a revelation. They preheat almost instantly, distribute heat more evenly and deliver fast temperature recovery after food is placed on the surface. All sealed burner rangetop models are constructed of stainless steel and can be ordered in natural or LP gas.

Planning Information

The platform to support the sealed burner rangetop must include a cut-out for electrical and gas supply connections. Refer to the chart below for minimum base support.

When installing against a combustibile surface, a minimum 5" (127) riser is required for model SRT366, and a minimum 10" (254) riser is required for 36" and 48" sealed burner rangetops with a charbroiler or griddle. Follow all minimum clearances to combustibile surfaces shown in the illustration on the following page.

A Wolf pro ventilation hood is recommended with the sealed burner rangetop. Refer to page 144 for pro ventilation.

A downdraft can be used with models SRT304 and SRT366. An accessory trim kit is necessary for this installation. Contact an authorized Wolf dealer for details.

Outdoor Grills | Modules

Taste what happens when the heritage of professional cooking moves from the kitchen to the patio. Like their indoor counterparts, Wolf outdoor grills are precision instruments. Constructed of heavy-duty stainless steel, the 30", 36", 42" and 54" grills have powerful burners every five inches for even heat distribution. An electric rotisserie with infrared burner produces succulent poultry and roasts. All grill models can be built in and all except the 54" grill, can be used on a cart for portable convenience. The 25,000 Btu burner module can be built into an outdoor kitchen and the side burner attached to a cart. Wolf grills and modules can be ordered in natural or LP gas.

OG36, OG42	16,000 (4.7)
OG54	(2) 14,000 (4.1)

Planning Information

For portable applications, Wolf grill carts are designed specifically to fit grill models OG30, OG36 and OG42 and the side burner. Model OG54 is designed for built-in applications only.

For built-in applications, Wolf outdoor grills and the burner module are designed for easy placement into a built-in enclosure. For outdoor grills, installation in a combustible enclosure requires an insulating liner. For the burner module, an insulating liner is not required. The enclosure should be built according to specifications for your specific installation on the following pages. If the burner module is installed next to an outdoor grill, a minimum of 12" (305) is required between units on the rotisserie motor side and 2" (51) on the opposite side. A rotisserie side conversion kit is available from an authorized Wolf dealer.

Optional stainless steel accessory doors and drawers are available for built-in applications.

Grill carts, insulating liners and stainless steel doors and drawers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

Planning Information

ELECTRICAL

Installation must comply with all applicable electrical codes.

The electrical outlet must be located within reach of the power cord. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type, GFCI
Power Cord	6' (1.8 m)

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

If the outdoor grill is being connected to a whole house LP supply, the LP gas pressure regulator is not provided. It can be purchased from an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

Planning Information

Wolf cooktop ventilation hoods are recommended for use with Wolf induction, electric and gas cooktops and modules. For ranges and rangetops, a Wolf pro ventilation hood is recommended.

These hoods have a telescopic chimney flue. A flue extension is available through an authorized Wolf dealer.

Installation of the cooktop hood should be 24" (610) to 36" (914) from the bottom of the hood to the countertop.

Wall and island hoods require an internal, in-line or remote blower assembly, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Refer to ventilation suggestions on pages 150–153. Cooktop hoods have a vertical discharge with 6" (152) round duct.

Consult a qualified HVAC professional for specific installation and ducting applications.

ELECTRICAL

Installation must comply with all applicable electrical codes.

For wall hoods, locate the electrical supply within the shaded area shown in the illustration below. For island hoods, locate the electrical supply on the ceiling inside the top of the hood. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 110/120 VAC, 60 Hz
Service	15 amp dedicated circuit

24" (610) TO 36" (914) BOTTOM EDGE TO COUNTERTOP

Electrical location for all wall hoods

Downdraft Ventilation

Constructed of heavy duty stainless steel, the Wolf down-draft rises from the countertop to whisk away odor and smoke into stainless steel, mesh filters and can be lowered beneath the countertop when not in use. Downdrafts integrate perfectly with transitional induction and electric cooktops, gas cooktops and some modules, they can also be installed with certain sealed burner rangetops.

DOWNDRAFTS

DIMENSIONS

NOTE: Shown with front mounted internal blower with 6" (152) round discharge, dashed line represents rear mount.

WIDTH	W	A
DD30	30" (762)	26 1/2" (673)
DD36	36" (914)	32 1/2" (826)
DD45	45" (1143)	38 1/2" (978)

Planning Information

Wolf downdrafts can be installed with most Wolf cooktops, but are not compatible with contemporary cooktops and the grill, steamer and fryer modules. Downdrafts can be installed with sealed burner rangetop models SRT304 and SRT366.

For installation with a Wolf cooktop, a minimum 25¹/₈" (638) deep flat countertop is required.

For installation with a sealed burner rangetop, an accessory trim kit is required. Contact an authorized Wolf dealer for details. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

The remote-mounted control module can be positioned horizontally or vertically. It must be located within 9' (2.7 m) of the downdraft assembly and a minimum 3" (76) from the edge of the cooktop cut-out.

Consult a qualified HVAC professional for specific installation and ducting applications.

BLOWERS

Internal, in-line and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Refer to ventilation suggestions on pages 150–153.

Internal blowers have a 6" (152) round discharge, can be front or rear mounted and can be discharged in any direction by rotating the blower box. In-line and remote blowers have a 10" (254) discharge and can be discharged from the front or rear.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Certain installations may require that the electrical supply be placed in an adjacent cabinet.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz

Planning Information

Pro ventilation hoods and hood liners are recommended for use with all Wolf cooking appliances. Wall hoods should be at least as wide as the cooking surface, and island hoods should be 3" (76) wider on each side.

For optimal performance in wall hood applications, a pro 27" deep wall hood is recommended for use with ranges and rangetops with a charbroiler or griddle.

Installation of the hood should be 30" (762) to 36" (914) from the bottom of the hood to the countertop.

Pro hoods and hood liners are shipped without a blower assembly. Internal, in-line and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. The blower will vary in size and is dictated by the cooking unit, volume of air and length of the duct run. Refer to ventilation suggestions on pages 150–153.

Pro hoods accommodate a 10" (254) round duct. Low-profile wall hoods allow for an adjustable discharge. All other pro hoods have a vertical discharge. For the 24" and 27" deep wall hoods, a horizontal discharge kit is available through an authorized Wolf dealer.

Consult a qualified HVAC professional for specific installation and ducting applications.

Optional stainless steel duct covers in a variety of heights are available for pro wall and island hoods through an authorized Wolf dealer.

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following page. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit

RECIRCULATING INSTALLATION

Low-profile, 24" and 27" deep wall hoods with an internal blower (600 CFM or less), 30" (762) and 36" (914) widths only, can be used in a non-ducted application with a recirculating filter. In this installation, kitchen air is purified through filters and returned as clean air into the room. A recirculation kit, available through an authorized Wolf dealer is required.

CUSTOM HOOD APPLICATIONS

Wolf pro hood liners are for use in custom hood applications. The decorative hood can be created out of wood, plaster, tile or metal. The shape of the hood is not critical, however, the bottom of the hood and liner must be on the same plane. The height of the liner does not need to accommodate the entire height of the decorative hood.

Installation

HOOD LINER

30" (762) TO 36" (914) BOTTOM EDGE TO COUNTERTOP

Blower Assemblies

For Wolf ventilation hoods and downdrafts that do not include a blower assembly, an internal, in-line or remote blower assembly must be selected to accommodate the cooking appliance, CFM requirements and homeowner preferences. Internal, in-line and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

Ventilation suggestions on the following pages provide Wolf product CFM and blower options for each ventilation hood and downdraft.

Refer to the illustrations below for dimensions of Wolf in-line and remote blowers. Installation instructions shipped with each Wolf ventilation product provide detailed specifications. These instructions can also be found on our website, wolfappliance.com/specs.

Wolf Appliance Residential Limited Warranty

FOR RESIDENTIAL USE

FULL TWO YEAR WARRANTY*

For two years from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf factory certified service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: gas burners (excludes appearance), electric heating elements, blower motors (ventilation hoods), electronic control boards, magnetron tubes and induction generators. If the owner uses Wolf factory certified service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. The warranty applies only to products installed in any one of the fifty states of the United States, the District of Columbia or the ten provinces of Canada. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.

THE REMEDIES DESCRIBED ABOVE FOR EACH WARRANTY ARE THE ONLY ONES THAT WOLF APPLIANCE, INC. WILL PROVIDE, EITHER UNDER THIS WARRANTY OR UNDER ANY WARRANTY ARISING BY OPERATION OF LAW. WOLF APPLIANCE, INC. WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM THE BREACH OF THIS WARRANTY OR ANY OTHER WARRANTY, WHETHER EXPRESS, IMPLIED OR STATUTORY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other legal rights that vary from state to state.

To receive parts and/or service and the name of Wolf factory certified service nearest you, contact Wolf Appliance, Inc., P.O. Box 44848, Madison, WI 53744; check the contact & support section of our website, wolfappliance.com, email us at customerservice@subzero.com or call 800-222-7820.

*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

*Replacement filters for ventilation hood recirculating kits are not covered by the product warranty.

Wolf Appliance Outdoor Limited Warranty*

FOR RESIDENTIAL USE

FULL ONE YEAR WARRANTY**

For one year from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf factory certified service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: stainless steel briquette trays, gas valves, drip pans, electronic control boards and electric heating elements. If the owner uses Wolf factory certified service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

LIMITED LIFETIME WARRANTY

For the life of the product, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: all stainless steel components (excludes surface corrosion, scratches, discoloration, weather and atmospheric related staining and minor surface rust and oxidation). If the owner uses Wolf factory certified service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. The warranty applies only to products installed in any one of the fifty states of the United States, the District of Columbia or the ten provinces of Canada. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.
