Cleaning and care

Cleaning the milk pipework

The milk pipework must be cleaned with 7 minutes.

You need one packet of the Miele cleaning the brew unit has been degreased. agent for milk pipework.

The cleaning process cannot be cancelled once it has started. The process has to be carried through to the

■ Touch "Maintenance" (③) in the main menu and then "Clean the milk pipework"

The process will start.

Follow the instructions in the display.

Fill the water container with lukewarm water up to the level marker //// and add 1 packet of Miele milk pipework cleaning agent to it. Replace the water container.

When "Fill and replace the water container" appears in the display:

Remove the water container and rinse it carefully with clean water.

Make sure that no cleaning agent is left in the water container.

The cleaning process is finished when "Process finished" appears in the display.

Degreasing the brew unit

After 200 portions have been dispensed, the cleaning agent. Cleaning takes approx. "Degrease the brew unit" will appear in the display. This message will not go out until

> You need 1 Miele cleaning tablet to degrease the brew unit. The process takes approx. 10 minutes.

The cleaning process cannot be cancelled once it has started. The process has to be carried through to the

- Touch "Maintenance" (③) in the main menu and then "Degrease the brew unit".
- The process will start.

Follow the instructions in the display. When "Place a cleaning tablet in the ground coffee chute and close the chute" appears in the display:

- Remove the coffee chute cover and open the lid of the coffee chute. Place a cleaning tablet into the coffee chute.
- Follow the instructions given in the

The brew unit has been degreased when "Process finished" appears in the display.

Descaling must be carried out and takes approx. 20 minutes.

You will need 2 descaling tablets.

fold here

Descaling

The descaling process cannot be cancelled once it has started. The process has to be carried through to the end.

■ Touch "Maintenance" (③) in the main menu and then "Descale the appliance"

The descaling process will now start.

Follow the instructions in the display.

Fill the water container with lukewarm water up to the level marker 云 and drop 2 descaling tablets in it. Replace the water container.

Follow the instructions on the packet for the mixing ratio carefully. It is important that you fill the water container with the correct amount of water (not less or more), otherwise descaling will be cut short and must then be repeated.

When "Fill the water container with fresh tap water up to the descaling mark S^{*} appears in the display:

Remove the water container and rinse it carefully with clean water.

Make sure that no descaling agent is left in the water container.

Descaling is finished when "\$" appears in the display.

Tips for use

Changing the portion size or drink parameters

The changed portion size or drink parameter is always stored in the current profile.

The name of the current profile is shown in the top left of the display.

Start in the drinks menu.

- Place the desired cup under the main dispenser.
- Touch "Edit" and then "Change drink".

Swipe the screen until the drink you want appears, then touch it to select it. You can now "Change the portion size" or

program "Drink parameters".

Changing the portion sizes

Touch "Change the portion size".

"Save" will appear in the display.

Touch "Save" when the cup has been filled to the level you want. Touch "Save" when the cup has been filled to the level you want.

Touch the ingredients you want to set the portion size for.

The ingredients selected will have a check beside them.

Touch "OK".

Touch "Save" when the amount you want of the particular ingredient has been dispensed.

Save the portion size required for the selected ingredients.

portion sizes will now be dispensed every time that particular drink is selected.

Tip: You can cancel portion size programming as long as "Stop" is showing in the display.

Setting the drink parameters

Touch "Drink parameters"

The following parameters can be set:

- The desired drink will be prepared and

- Amount of coffee
- Brew temperature
- Pre-brewing
- Touch "OK" when you have set the parameters to your requirements.

Resetting drinks

To reset the portion sizes and the parameters for all drinks back to their factory default setting:

- Touch "Edit" in the Drinks menu and then "Reset drinks"
- "Reset all drinks to default?" will appear in the display.
- Touch "Yes".

- The programmed mix of ingredients and

Profiles

fold here

You can set up individual user profiles and save individual portion sizes for all drinks for each profile.

The name of the current profile is shown in the top left of the display.

Accessing a profile

■ Touch "Profiles" ▲ in the main menu or You can save a maximum of 9 drinks in a touch "Profiles" in the bottom right of the profile. Drinks menu.

Creating a profile

- Touch "Create profile".
- The keyboard will open in the display.
- Enter the name you want and touch "OK"

If you have already created a profile, the following options are available to you:

- Select profile
- Change name
- Delete profile
- Change profile (The coffee machine changes "Manually", "After each use" or "When turned on").

Creating drinks for a profile

- You can create your own drinks for each profile and set the portion size and drink parameters individually.
- You can change the names of drinks in a profile.
- Select the profile you want.

Creating a drink

- Touch "Create drink" and select the required drink from the standard drinks.
- Change the drinks parameters as required. Save the amount you want of the individual ingredients.

- After dispensing, the keyboard will open in the display.
- Enter a name for the new drink and touch "Save".

If you have already created a drink, the following options are available to you:

- Change drink
- Delete drink

MvMiele

You can display drinks you make frequently, drinks from profiles and maintenance programmes in the MyMiele screen

Opening the MyMiele P = menu

Touch "MyMiele" $\mathbf{A} = \mathbf{b}$ in the main menu.

You can now configure "MyMiele" and add entries ("Add entry").

To add entries

You can select options listed in the following categories:

- Drinks 🕫
- Profiles 🖁
- Maintenance 🚳
- Touch "Add entry".

If you have already added some entries, you can carry out the following under "Edit":

- sort or
- delete entries

Making drinks with milk

the main dispenser.

Touch the drink you want:

Cappuccino

Caffè Latte

Hot milk

Milk froth

Latte macchiato

The selected drink will now be made.

Place a suitable container underneath

Drinks with milk

Notes on the milk container

The milk will not keep cool in the milk container. It should therefore be kept in the fridge if you are not going to be using milk for a long period. Cold milk (below 55°F/13 °C) gives the best results for milk froth.

(2) Sensor rod ③ Milk intake tube ④ Glass container

Fill the container with milk up to a maximum of 3/4" (2 cm) below the rim.

Push the milk container fully back into the coffee machine.

Hot water

- Place a suitable container underneath the hot water dispenser.
- Select "Hot water" 台.

Hot water is dispensed into the container under the dispenser.

To cancel preparation:

Touch "Cancel" or "Stop".

Please observe the detailed information on cleaning and care in the Operating instructions. Clean the coffee machine every day after use.

Please observe the detailed information on cleaning and care in the Operating instructions. Clean the coffee machine every day after use.	What do I have to clean / maintain?
Every day	- the milk container and lid
(at the end of the day)	- the water container
	- the waste unit
	 the drip tray and grid
Once a week	- the main dispenser
(or more often if needed)	- the main dispenser connector
	 clean the milk valve with the cleaning brush
	- the interior
	 the small drip catcher inside the front of the machine
	- the brew unit
	 the front of the machine (especially straight after descaling)
Once a month	 lubricate the cap on the main dispenser connector
When prompted	 the milk pipework (using the cleaning agent for milk pipework)
	 the brew unit (degrease with the cleaning tablets)
	- descale the machine
As required	- the coffee bean container
	 remove any blockages from the milk pipework

The following items are not dishwasher safe:

- Main dispenser cover
- Brew unit
- Coffee bean container and lid
- Service cover

All other removable components of the coffee machine are dishwasher safe.
