

LS50 Wireless II

Connectivity Quick Guide

Every note. Every word.
Every detail.

The Ultimate Wireless Hifi

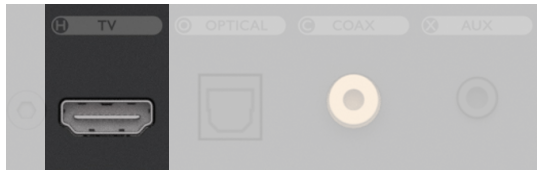

More than a loudspeaker, LS50 Wireless II is an all-in-one speaker system for the person who wants fantastic sound...no strings attached.

HDMI eARC Connections

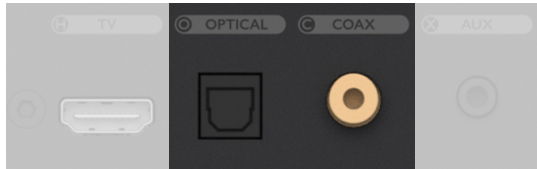

Two channel audio (PCM) from all TV connected sources via HDMI eARC (HDMI audio and i2S not supported)

Optical and COAX

Connect to a wide variety of digital sources: Ideal for televisions without HDMI eARC. Use both connections for use with multiroom systems.

Cable Set Top

TOSLINK

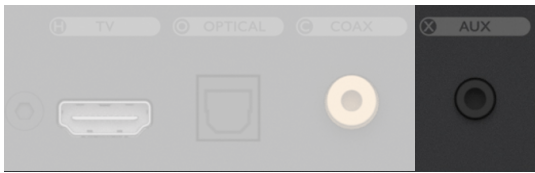

SONOS

Analogue

Connect to any analogue source. On-board ADC converts signal to 192kHz/24bit digital.

Turntables must have a phono stage.
Check manufacturer's requirements.

Cable Set Top

A stereo RCA to 3.5mm converter cable can be used for devices with stereo RCA outputs.
