Installation Instructions

WARNING: OVER TIGHTENING OF SCREWS CAN DAMAGE PARTS AND CAN LEAD TO SERIOUS PERSONAL INJURY AND DAMAGE TO EQUIPMENT! DO NOT over tighten screws when installing interface brackets.

NOTE: Step 1 is only required when installing an SLB/SSB interface bracket. If an SLM/SSM bracket is being installed, proceed to step 2.

1. Screw thumb screws onto 10-24 x 5/8" Phillips pan head screws. DO NOT fully tighten thumb screws at this time.
2. Turn projector upside down on a flat surface.
3. Place four nylon spacers over four threaded inserts in bottom of projector.
4. Place the interface bracket onto the spacers on bottom of the projector, aligning the mounting holes in the bracket with the spacers and the threaded inserts in the bottom of the projector, and ensuring that bracket faces front of projector as noted in above graphic.
5. Position M6 x 20mm mounting screws into the threaded inserts and bracket. Tighten all fasteners at this time, securing the bracket to the projector.

NOTE: Security screws can be substituted when mounting interface bracket to projector by using the parts and installation instructions in the All-Points Security Kit.
