

Installation instructions: HushMat Ultra Quiet Kit on Dishwasher Applications

Estimated completion time of 20-30 minutes.

Step 1 – Remove dishwasher from cabinets.

Cabinet mount dishwashers have two screws under the counter lip, holding them in place. Remove these two screws and slightly bend downward the attaching brackets. This will prevent the bracket from catching the bottom of the counter surface and scratching the surface.

Gently pull the dishwasher out.

Step 2. Remove the insulation pad from the dishwasher.

Lay the insulation pad to the side for later reinstallation.

Step 3. Remove HushMat Ultra Sheets by peeling the release liner and place onto the body of the dishwasher. Be sure to place hand pressure across the total surface of the pads to assure proper adhesion. If required, use scissors to cut the material into smaller shapes to fit the contour of your dishwasher.

Step 4. After installation of the Ultra pads. Use Hushmat Quiet tape to reattach the insulation pad to the dishwasher as shown.

Step 5. Reinstall the insulation pad.
