

Multiroom **simplified**

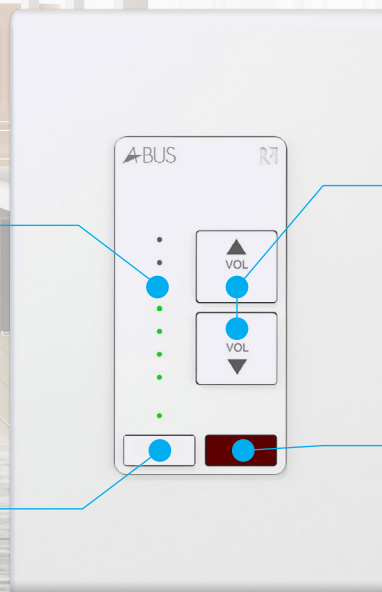

Simple and elegant, the A-K4 Amplified Keypad provides easy control of your music. Turn it on or off, select from up to four sources, or adjust the volume with just a touch.

Elegant, discreet LED's for Volume Level and Source Selection

The LED volume level display is designed to be visible to the user, but not so bright as to cause issues when mounted in a living room or any room where darkness is desired.

Easy Source Selection

When used with a multi-source hub like the A-H484, the power button becomes a source toggle, letting you easily switch between any connected sources.

Large, easy to find volume buttons

The generous size and placement of the volume buttons allows for easy access and control.

Convenient Infrared Port

Having the freedom to enjoy your music anywhere in your home doesn't mean you have to sacrifice controlling the music at the same time. Use a remote control to play/pause, skip forward/back, etc. or any other function that your audio source offers through its remote control no matter where it is located in your home.
