

## Wall-mounted Touchscreen

New Generation of In-wall Music Control is Here!

The in-wall App! The XTS Touchscreen is a stylish in-wall touchscreen that runs an embedded version of the popular MyRussound™ App. XTS works exclusively with Russound MCA-Series/C-Series Controllers and XStream™ systems. Connects to the network rather than the controller, making placement even more flexible. Plus, the XTS makes it easy to keep your interface up-to-date with MyRussound app software updates only a touch away.

By placing the powerful MyRussound app in a permanent location on a wall, the XTS gives you full control and easy access to your Russound system, eliminating the need for your phone or tablet to simply change the volume or switch favorites. Power over Ethernet (PoE) allows the XTS to receive power over the same Ethernet connection used for communication, requiring only one CAT-5/6 cable run to a single-gang workbox or p-ring at the location.

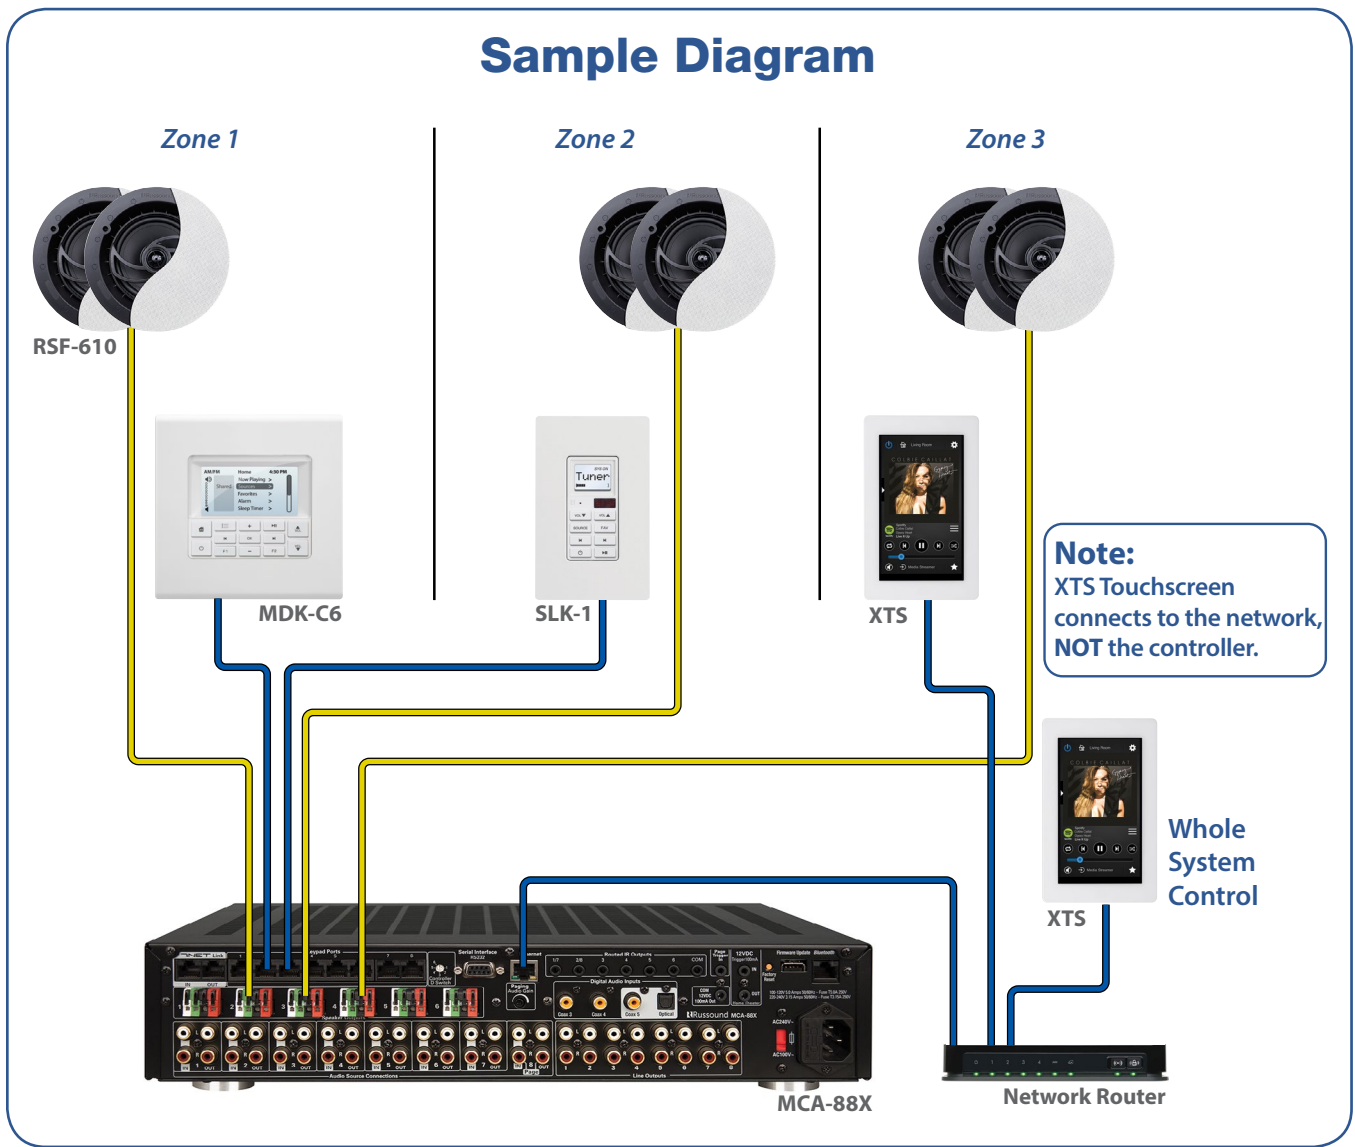

### Features

- Elegant, low-profile design
- 4.7" (11.9 cm) high resolution QHD display
- Runs the MyRussound™ App
- Powerful Cortex-A9 dual core processor
- Adjustable display brightness and screen timeout settings
- Supports all MCA-Series/C-Series controllers and XStream systems
- Controls any zone within a Russound system
- One-year limited warranty

Easy to install with 1-gang mounting ring
